EVOLUTION AND CREATIONISM : A DOCUMENTARY AND REFERENCE GUIDE (BK4190)

As recently seen by the Kitzmiller vs. Dover case, the evolution versus creation debate never goes away. The best way to understand these debates is to read the arguments of the individuals involved. This reference work provides over 40 of the most important documents to help readers understand the debate in the eyes of the people of the time. Each document is from a major participant in the debates—from the predecessors of Darwin to the judges of the influential court cases of the present day. The editors have included an introduction and analysis of each document that places it within historical and scientific context. 298 pages

FAITHQUESTIONS - WHAT ABOUT RELIGION AND SCIENCE?: A STUDY OF REASON AND FAITH (BK3711)

This book invites us to consider ways to remain confident in our faith as we understand and appreciate the discoveries and advances of science. How can Christians integrate, believe, or accept all the teachings of science, the Bible, and Christian tradition? How can we believe in both the discoveries of science and the Bible? Are science and religion compatible or incompatible? As Paul Stroble addresses these questions and others, he helps us examine different possible ways that religion and science relate to each other and ways that science and religion provide meaning and value in our lives. 112 pages

RELIGION AND SCIENCE PATHWAYS TO TRUTH 2 DVD Set

DVD 282 and DVD 283

Join a group of world experts as they consider how religion and science might coexist and even complement one another in the 21st Century. 120 mins
